Citrix Systems Selects Covisia Solutions As 2008 Northeast Partner of the Year

Covisia Wins Award Based On Ability To Deploy New Citrix Technologies and Add New Citrix Customers

Waltham, MA – April 22, 2009 – Covisia Solutions, Inc. announced today the company has been chosen by Citrix as the 2008 Northeast Partner of the Year. A provider of technology solutions and support with a focus on improving IT efficiency for clients throughout the New England area, Covisia received the award based on growth as well as consistently going above and beyond every aspect required of Citrix Platinum Partners.

The Citrix Partner of the Year award process includes assessments of how partners perform across five key areas: sales, customer support, marketing, customer satisfaction and a commitment to working closely with Citrix. In winning the award, Covisia competed against other Citrix partners with significantly higher revenue but was chosen by Citrix for consistently supporting a large base of customers that were early adopters of new Citrix technologies. Covisia also won for continuously focusing on adding new customers by offering Citrix solutions.

"Through a commitment to maintaining Citrix technical certifications across the Citrix Application Delivery Center, and through sales and marketing leadership, Covisia has built solid and trusting relationships with Citrix field sales teams," said Tom Eacobacci, Area Sales Vice President. "Covisia also understands how to partner with customers and Citrix to provide the most cost-effective solutions with confidence and professionalism. On behalf of the entire Citrix team, congratulations to all at Covisia for the dedication and professionalism that earned them the 2008 Northeast Partner of the Year award."

William Fistori, CEO and President of Covisia Solutions, added, "Covisia is honored by being recognized as the Citrix Northeast Partner of the year. This award signifies a 16-year mutual commitment by Covisia and Citrix to deliver innovation and application delivery excellence to our customers. The application delivery landscape is changing, and we can depend on Citrix to help us provide our customers with products and services to meet their business goals and objectives."

Covisia will receive formal recognition for the Northeast Partner of the Year award May 3-4 in Las Vegas at Citrix Summit 2009, the premier training conference exclusively for Citrix partners.
